---

## PROFESSIONAL SUMMARY

An enthusiastic and details-oriented front end web developer. Always keen about customer satisfaction, and ensure the delivered solution meets the requirements in a timely manner.

---

## CORE SKILLS

- Solid experience in web technologies: HTML5, CSS/CSS3, SASS, JavaScript/jQuery, JSON.
- Basic experience in modern javascript MV\* frameworks like Angular.
- Good understanding of responsive design principles and cross browser compatibility.
- Good experience in version control system (Git), build tools (Gulp), package managers (NPM).
- Good experience in Content Management Systems (Sitecore, Drupal, Joomla).
- Familiarity with Scrum/Agile development approach.
- Basic experience with server-side technologies like: C#, ASP.NET, Node.js.
- Good understanding of Unit testing, Design patterns, MVC, Object Oriented Programming (OOP), RESTful API, Data structures and algorithms.

---

## WORK EXPERIENCE

### Senior Front end Developer

JUL 2016 - DEC 2017

Mondia Media Group GmbH, Cairo – Egypt

#### Primary responsibilities:

Leading a team of five front end developers (3 Juniors and 2 mid-level). As well as managing my team, I was involved in the entire front end development life-cycle for Mondia Media's digital entertainment products, Here are a few example of successfully delivered projects:

- Vodacom Music Shop [ <http://music.vodacom.co.za/> ]
- Vodacom South Africa Games shop [ <http://vodacom-games.mondiamedia.com/> ]

- 
- Vodacom Live Portal [ [http://smart.vodacom.co.za/vlive/portal\\_page\\_homepage](http://smart.vodacom.co.za/vlive/portal_page_homepage) ]

We have delivered many successful projects (Online Portals, Music/Games Shops) to telecom companies like Vodafone Germany/South Africa, O2, Tim Italy, Ooredoo Algeria, DU Emirates.

For the front end technology, We have used **HTML5 / CSS3 / SASS / JS / jQuery** and **Ajax** to build reusable UI components and connect to **RESTful APIs** based on **Node.js** and **Java** technology.

Lastly, I was involved in hiring, training new team members and conducting technical interviews.

---

## Web Developer

JAN 2012 - JUL 2016

HSBC (Operations, Services and Technology), Giza – Egypt

### Primary responsibilities:

Worked as a part of a global team of Web Developers, Quality Engineers, Scrum Masters, Product Owners. This multicultural inhouse team was responsible to develop and maintain the public websites of HSBC bank worldwide.

We have used "[Sitecore](#)" (based on .NET) as our main CMS platform to develop reusable components and multisite structure.

The following are a few samples of my contributions as a front end developer:

- HSBC New Zealand [ <https://www.hsbc.co.nz/> ]
- HSBC Hongkong [ <https://www.hsbc.com.hk/> ]
- HSBC Luxembourg [ <http://www.hsbc.lu/> ]

### Achievements:

- Contributed in developing "**HSBC 150th Anniversary Banknote**" web application – a multi-tier enterprise application with complex backend components (.NET/C#) and a customer-facing website for celebrating HSBC 150th anniversary. Beside my front end contributions in this project, I have also acquired new skills in **C#** and **.NET** programming basics.
  - Contributed in the development of project G-Track – An Internal web-based tool used to track the progress of internal projects. It saved for HSBC around USD 240K per year.
- 

## Front end Developer

JAN 2007 - JAN 2012

Road9 Media, Cairo – Egypt

### Primary responsibilities:

I was one of the first two hired developers in Road9 Media – It is a web startup that focused on delivering small to midsize web projects to customers from Europe, Canada, and the Middle east.

As a startup we have used opensource technologies, PHP-based CMSs, Linux...etc. We've used [Joomla CMS](#) for most of our websites but we needed a more stable and secure system.

---

Therefore, I took the initiative to learn **Drupal CMS** in order to deliver more robust, secure, and maintainable websites to our clients. And I have shared the knowledge with the rest of the team via conducting training sessions. The following is an example of my day-to-day tasks:

- Develop cross-browser compatible UI themes for websites using (**xHTML, CSS, JS/jQuery**).
  - Conducting knowledge sharing sessions and mentoring new team members.
- 

### Freelancer Web Developer

JUL 2005 - JAN 2007

Freelancer, Cairo – Egypt

I started my career as a Web Designer/Developer freelancer. I was responsible for the whole project life-cycle from design phase till development and launching on live server.

---

## EDUCATION

### Sadat Academy for Management Sciences, Cairo – Egypt

Bachelor degree in management sciences (Major: Computer and Information Systems)

SEP 2001 - JUN 2005

---

## AWARDS/CERTIFICATES

[Sitecore XP 7 Website Development for .NET Developers \(WND\)](#)

Scored 7.5 out of 9 in IELTS (General Test), The result can be verified via [IELTS Test Report Form \(TRF\)](#)

---
